Item #RAVTISL79

Experience the incredible luxury of Ravenscroft Crystal.

Ravenscroft Crystal combines the qualities of old-world European craftsmanship with a modern understanding of how the shape of a wine glass can significantly enhance the tasting experience. Ravenscroft glassware designs are developed out of the deepest respect for great wine and are hand blown in nearly 30 different styles; each of which are the result of thousands of years of glass making trial-and-error. Their ultimate goal is to enhance the bouquet and taste of the wine or spirit for which it was made.

The world's most famous enologist, once said, "A wine glass should be invisible." In this spirit, Ravenscroft's mission is to produce the most transparent, lightweight wine glasses possible. Their delicate stemware delivers a whisper-light, sensuous hand and mouth feel. Each glass is shaped to perfectly control the palate attack, delivering a pure essence with minimal distraction.

Harbour Food Service Equipment is proud to add Ravenscroft to its line of glassware. All items pictured are currently available in-stock, with dozens of other options available for special order. For more information, either search for the item number listed, or go to Tableware: Glassware and click on the Ravenscroft logo in our online catalog.
